- Q.96 The intracellular non-enzymatic fractional degradation of a compound X,  $f(x)$ , is related to its concentration  $x$  through

$$f(x) = \lim_{x \rightarrow 0} \frac{\sqrt{1+x} - 1}{x}.$$

At a negligible concentration of X, its fractional degradation is

- Q.97 The distance  $x$  (in  $\mu\text{m}$ ) covered by a molecule starting from point A at time  $t = 0$  and stopping at another point B is given by the equation
